### ***The General measures to contain the effect of an outbreak of Corona virus (COVID-19)***

- The company's management formed a teamwork to develop and implement contingency plans to counter the negative effects on the expected business and cash flows of the company in terms of a decrease in revenues and an expected decrease in operating cash receipts and is currently closely monitoring and continuous evaluation of all developments and accordingly the following decisions were taken:
- 1) Providing the necessary raw materials for the continuation of production operations without interruption and with the full production capacity of the company, so that the main raw materials are relied on in production from the local market and try to communicate with external suppliers to provide sufficient quantities for the continuation of production as the company depends on providing the raw materials used in the industry from the two local markets And external.
  - 2) The company resumed export operations for the requirements of external clients, based on official correspondence from clients.
  - 3) The company's plan not to dispense with employees, so that the necessary preventive measures were taken to maintain the health of its employees.
  - 4) The management monitors the cash flows on a monthly basis and concluded that the expected cash flows will be positive during the coming months without any problems in the current cash flow. Accordingly, in the previous year the administration decided to pay all bank loans on time and take advantage of the central bank's initiative to postpone the installments for a period of six months.
- The management evaluation included the following areas in consideration while assessing the impact of the emerging coronavirus.
- The risk of impairment of fixed assets
  - The risk of declining inventory value due to the presence of slow moving items.
  - Risks of not being able to pay the obligations owed to banks, creditors and workers on the due date.
  - Risks that may arise from any claims resulting from lawsuits
- The management concluded that there is no impact on the company's work that could lead to a decrease in the value of fixed assets, as the factory operates as planned to meet customers' demand and the company pays all its obligations on the due date, in the previous year The company has also chosen to benefit from the initiative announced by the Central Bank of Egypt to postpone installments for a period of six months. The company's management also believes that, in the current circumstances, it is able to continue production, sales and purchases, and pay its obligations and cash flows to meet the company's objectives.

- iii) elastic & cordon sales

\* Subsidiary company sales by sales invoices.

\*\* Internal operation without sales invoices, but it is evaluated to know the value of the total revenue of elastic and cordon.

## Outlook

DICE remains optimistic about its future growth. Management finalized the acquisition transaction of currently leased assets of Cairo Cotton Centre in Feb 2020. Furthermore, a new expansion in manufacturing elastic & cordon takes a place in 2019, an expansion that would lead to a cost reduction as well as adding a new segment of revenue.

DICE also intends to increase third party sales from its dyeing segment in order to capitalize on the low utilization rates.

Overall, DICE aims to reduce client concentration by attracting new clients; scaling its retail platform to improve revenue mix; and utilizing its dyeing and printing capacities to enhance profit margins.
